

Math 162 - Recitation Section for Loring

Instructor Taylor Dupuy

Office Hours Math 320, T,R 11:15-12:15 (right before class). These hours are subject to change.

E-mail dupuy@math.unm.edu

WebPages Professor Loring's page will have most of the information you need math.unm.edu/~loring
I also maintain a website: math.unm.edu/~dupuy

Recitation Section We will meet once a week in order to review material covered in your Calculus class, take quizzes, work group projects etc.

The recitation section is your opportunity to ask questions about things you are learning in the class. If you don't understand something, or you think there is a chance someone else in the class doesn't understand something, ask a question! I will try to answer them as best I can.

Group Projects When broken up into groups everyone in the group gets the same grade. As always your solutions should be written neatly and made as concise as possible (preferably one sheet of paper). Being understandable is important: points will be deducted for not making sense (i.e. if what is on the paper is incomprehensible to the grader).
